

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Edward Balassanian

Attorney Docket No. IMPL-1-1018

Serial No.: 10/775,550

Group Art Unit: —

Filing Date: February 10, 2004

Examiner: —

Title: SYSTEM AND METHODS TO UTILIZE COMPONENT ARCHITECTURE
FOR STREAMING AUDIO CONTENT

**TRANSMITTAL LETTER FOR NOTICE TO FILE CORRECTED APPLICATION
PAPERS**

TO THE COMMISSIONER OF PATENTS:

Specification amendments contained herein are designed to address the informality issues raised in the Notice To File Corrected Application Papers. Applicant has carefully amended the specification by removal of embedded figures in the original specification, transferring the figures to the attached Replacement Figures, redrawn to meet drafting illustration requirements, and re-labeled as Figures 1-4. The specification has been amended to synchronize the specification's content with the replacement drawings, to provide transitional phrasing solely to impart a smooth and consistent read to the replacement specification, and to sectionize the specification to a formal form that is customary for utility applications. The marked-up replacement specification version shows the deletions and additions, and the clean copy is the finished corrected specification application paper.

Applicant believes that the specification and figure amendments address the issues raised in the Notice To File Corrected Application Papers and do not constitute new matter.

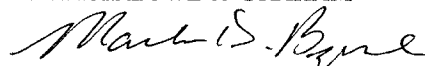

Accordingly, Applicant asserts, that no new matter has been added.

Enclosed with this transmittal letter are the following papers:

1. Copy of Notice of Incomplete Reply
2. Replacement Specification – marked up
3. Replacement Specification – clean
4. Replacement figures sheets 1 through 4
5. Petition for Extension of Time

Respectfully submitted,

BLACK LOWE & GRAHAM^{PLLC}
